

The Trouble Notification System (TNS-1000) **alerts CO technicians immediately** to important WFA/DI ALARMS. The TNS has been proven to reduce alarm clearing times and "pick-up" times 30% to 50%.

Features:

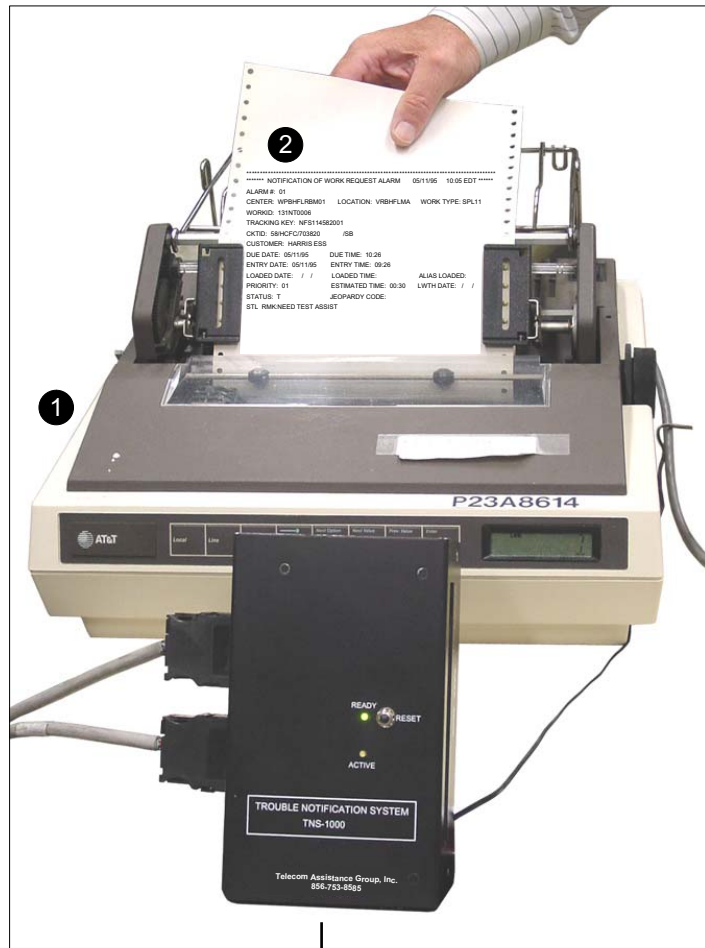

"Smart (WFA/DI) Monitor"

- 1 In-line with LTERM printer bridged on datastream.
- 2 Reads critical trouble ticket information "Notification of Work . . ."

Outputs

- 3 LOUD audible alarm with volume control.
- 4 Pager

000 = TNS Signature
 723 = NNX
 01 = Priority
 22 = NT
 06 = Ticket Number

Application:

Pages technician based on the location, time of day, and type of trouble (Work ID, toll, switch, or frame). The pager displays the office (NXN), priority (01), and code 22 indicates a Work Code: NT (toll).

Ordering Information:
